“ghirigoro,” a bracelet and ring that comes in a new style

“ghirigoro” means “doodle” in the Italian language. This line of jewellery has been created for consumers with sophisticated tastes who wish to enjoy fashion freely, in their own ways. Using frames made in Italy and decorated with jewels through the application of advanced technology in Japan, a luxurious and elegant look is created for the wrists and fingers. To wear it, one simply has to twist and wrap it around the wrist or finger. Characterised by a free-size format that is achieved through the use of special “shape memory wire,” it will fit anyone, any time. Three versions are available: the “Two Line” with a bangle and ring that can be worn like a tennis bracelet, the “Three Line” with its beautiful silhouette, and the luxurious “Five Line” with its superb volume that looks just like pavé setting. The stones come in seven colour variations: clear, light green, pink, purple, light blue, red, and black. Please watch a movie.
